Company:	i4cast™
U.S. Headquarters:	3303 FM 1960 Suite 460, Houston, Texas 77068 Tel: ( 281 ) 397-7029 Fax: ( 281 ) 397.6487 Website: <a href="http://www.i4cast.com">www.i4cast.com</a>
Established:	January 2002 (Joint Venture between Hewlett Packard and Alliance Data Corporation)
Management:	John Hawkins – President and CEO Harry Jones – Chief Operating Officer Christopher Kelso – Vice President of Sales & Marketing
Corporate Description:	i4cast™ is a leading Total Cost Management solution focused on delivering real-time, accurate cost for the enterprise-wide supply chain. At i4cast™ we have developed an Internet based Total Cost Management solution encompassing product costing, financial modeling, contract management and activity based costing.
Products:	i4cast™ develops and markets a suite of total cost management solutions. This suite of products include iCost™ (Central Console for Product Costing and Financial Modeling), xCost™ (eManufacturing Collaboration for Outsourced Manufacturing), iCM™ (Contract and Commodity Cost Management) and iABM™ (Activity Based Costing).
Business Value:	Our decision support tools allow our clients to have the very best costing information to build and manage greater product profitability, reduce your cost of goods sold, enhance your costing collaboration and increase your time to market capabilities.
Unique Characteristics:	Our solutions give you the ability to: <ul style="list-style-type: none"><li>• Provide a centralized global decision support tool for costing optimization within the entire enterprise.</li><li>• Jointly collaborate and co-source best product cost from customers, OEM's, partners and suppliers to all affected global business units.</li><li>• Improve the time to market and product profitability through enhanced BOM collaboration with partners as well as your internal sales, design, finance, procurement and engineering groups.</li><li>• Provide in depth and granular views of real-time costing data including materials, logistics, labor &amp; overhead, warranty, royalty and other costs that identify cost savings, drive revenues and lower product cost.</li><li>• Automate re-pricing and contract negotiation process.</li><li>• Run extensive BOM Modeling including "What if", Variance Reporting and Impact Analysis capabilities.</li><li>• Benchmark and source across multiple business partners, suppliers and manufacturing plants.</li></ul>
Markets:	i4cast™ is focused on providing total cost management solutions to the discrete manufacturing industry. Our areas of focus within this industry are Automotive, High-Tech, Consumer Electronics, Aerospace & Defense, Industrial Products and Consumer Products and Goods.
